

CFP-15 MOBILE OXYGEN GENERATING SYSTEM

"The trailer offers us the flexibility that we need to get a good start on the next hurricane season.

We are thrilled to have this new technology available to our staff and our community."

Gary Peters
President
Louisiana Rural Ambulance Alliance
Winnsboro, Louisiana

All components in the trailer were sold and installed by OGSi's authorized distributor Hy-Air Co. located in West Monroe, Louisiana.

OGSi Model CFP-15's inside the trailer.

HYPRES fill containment, cascade and manifold.

The trailer is outfitted with the following equipment:

- 2 OGSi CFP-15 Oxygen Generators
- HYPRES Fill Containment Station
- 8 Bottle Manifold (4 on each side of the trailer)

Oxygen Generating Systems Intl. (OGSi) partnered with Louisiana Rural Ambulance Alliance to create this new, state-of-the-art, mobile oxygen generating station. Using grant funding from the State of Louisiana, these emergency responders have purchased critical life saving oxygen generators from OGSi.

In the event of a medical emergency or natural disaster, the Louisiana Rural Ambulance Alliance will deploy this trailer and be able to generate oxygen onsite and administer relief immediately. This mobile unit eliminates dependency on delivered oxygen and allows them to focus on urgent care in a crisis. The trailer can operate on electricity if it is available or on a generator in the event of a power outage. This critical equipment provides them the flexibility they need during an emergency, and enables them to better respond to their community.
